EDUCATION

University of Central Florida

Bachelor of Science in Computer Science

– Campus involvement: Hack@UCF, Knight Hacks, Excel/Compass

Orlando, FL

Expected May 2027

TECHNICAL SKILLS

Languages: Python, Java, C, TypeScript, JavaScript, Dart, HTML/CSS, SQL

Frameworks: React, Flutter, Node.js, Express.js, Tailwind CSS, Vite

Tools: Git/GitHub, Docker, Linux, MongoDB, REST APIs, Netlify

Cloud: AWS, Terraform, VPC, EC2, S3, CloudFront, IAM, RDS, CloudWatch

AI/Automation: Claude Code, Codex, n8n, Make

EXPERIENCE

AI Automation and Systems Intern

DasFlow Sublimation Company

September 2026 – Present

Orlando, FL

- Analyzing existing quote-intake and project workflows to identify automation opportunities across required data, business rules, approval points, and systems of record.
- Supporting the design of Claude-powered agent workflows for requirements collection, task routing, validation, and human-in-the-loop approvals.
- Created a structured discovery framework covering workflow triggers, target outcomes, data dependencies, failure handling, and existing automations to translate business needs into implementation-ready requirements.

Technology and Communications Intern

Heron Heights Elementary School

April 2024 – September 2024

Parkland, FL

- Designed, developed, and maintained the school's website, improving usability and providing parents with up-to-date school information.
- Managed the school's social media presence by creating and publishing content to increase community engagement and communication with families.
- Provided technical support for staff and classroom technology, troubleshooting software and hardware issues as needed.

PROJECTS

CloudMart – AWS Cloud Architecture

AWS, Terraform, EC2, S3, CloudFront, RDS

- Built an AWS-hosted full-stack application to gain hands-on experience with cloud networking, compute, storage, and infrastructure as code.
- Configured a React frontend using private S3 storage, CloudFront distribution, HTTPS, and Origin Access Control.
- Deployed and validated a Node.js backend on EC2 using Systems Manager instead of SSH access.

Belle Menti Montessori School Website

HTML, CSS, Netlify

- Designed and deployed a responsive production website for a Montessori school using mobile-first design principles.
- Implemented SEO best practices including semantic HTML, meta tags, Open Graph tags, and canonical URLs to improve search visibility.
- Configured Netlify hosting, custom domain setup, HTTPS, and performance optimizations for a fast and secure user experience.
- Built an accessible UI using reusable layout patterns and CSS variables for consistent branding across pages.

SkillSwap – Skill-Based Social Networking Platform

React, TypeScript, Tailwind, Vite

- Developed responsive front-end pages for onboarding, dashboard, profiles, messaging, and offers using React and TypeScript.
- Built reusable Tailwind CSS components to maintain consistent styling and mobile responsiveness across the platform.
- Integrated front-end features with backend APIs for authentication, user profiles, skill listings, and real-time messaging.

MindCare – Mental Health Companion App

Flutter, Node.js, MongoDB, OpenAI API

- Developed a cross-platform mobile app with secure authentication, mood tracking, and AI-powered chat assistance.
- Implemented daily mood check-ins, history visualization, and analytics features using Flutter, Dart, and fl.chart.
- Built a REST API backend with Node.js, Express, MongoDB, JWT authentication, and Docker containerization.
- Integrated OpenAI GPT-4 to provide empathetic chat support and crisis resource recommendations.
