Education

University of Central Florida — Orlando, FL
Bachelor of Science in Computer Science — *Expected May 2027*
- Campus involvement: Hack@UCF, Knight Hacks, Excel/Compass

Technical Skills

Languages: Python, Java, C, TypeScript, JavaScript, Dart, HTML/CSS, SQL
Frameworks: React, Flutter, Node.js, Express.js, Tailwind CSS, Vite
Tools: Git/GitHub, Docker, Linux, MongoDB, REST APIs, Netlify
Cloud: AWS, Terraform, VPC, EC2, S3, CloudFront, IAM, RDS, CloudWatch
AI/Automation: Claude Code, Codex, n8n, Make

Experience

AI Automation and Systems Intern — September 2026 – Present
DasFlow Sublimation Company — *Orlando, FL*
- Analyzed quote-intake and project workflows to identify automation opportunities across data requirements, business rules, approval points, and systems of record.
- Mapped HubSpot deal stages and sales workflows to document required data, routing rules, approval points, and failure cases for Claude-powered automation.
- Created draft-only agent guardrails for outreach and pricing decisions, then validated behavior against sales scenarios.
- Built a structured discovery framework covering workflow triggers, target outcomes, data dependencies, failure handling, and existing automations to translate business needs into implementation-ready requirements.

Web Developer — Feb 2026 – Present
Belle Menti Montessori — *Hollywood, FL*
- Built and launched a responsive school website using React, Vite, and Tailwind CSS, translating staff requests into pages for prospective families.
- Deployed the site through Netlify with a Namecheap-managed domain and completed post-launch updates, including teacher roster changes and a new Ethics page.

Technology and Communications Intern — April 2024 – September 2024
Heron Heights Elementary School — *Parkland, FL*
- Designed, developed, and maintained the school's website, improving usability and providing parents with up-to-date school information.
- Managed the school's social media presence by creating and publishing content to increase community engagement and communication with families.
- Provided technical support for staff and classroom technology, troubleshooting software and hardware issues as needed.

Projects

ResolveOps – AI Support Operations Agent — GitHub
Python, FastAPI, React, TypeScript, PostgreSQL, pgvector, Claude API, Docker
- Built an AI support agent combining pgvector semantic retrieval, permission-scoped account lookups, and Claude tool calling to classify requests and draft cited replies and ticket actions for human approval.
- Implemented workspace and customer isolation, version-bound approvals, stale-policy detection, and idempotent ticket execution; validated application behavior through 127 backend tests and 50 browser checks.
- Evaluated Claude Haiku 5.5 across 50 synthetic support cases, recording 72–74% expected-action agreement across two runs; identified over-escalation and corrected cached-token accounting through live evaluation.

AWS Architecture Assistant — Live Demo
AWS, Claude Code
- Built an AWS architecture planning prototype that gathers business requirements, asks follow-up questions, and produces structured solution plans and architecture diagrams.
- Implemented service validation against a 41-service AWS catalog, linked recommendations to official AWS documentation, and enabled SVG diagram exports for technical review.
- Used Claude Code to assist implementation and troubleshooting; verified application behavior through 70 unit tests and 28 browser checks covering the demo workflow.

MindCare – Mental Health Companion App
Flutter, Node.js, MongoDB, OpenAI API
- Developed a cross-platform mobile app with secure authentication, mood tracking, and AI-powered chat assistance.
- Implemented daily mood check-ins, history visualization, and analytics features using Flutter, Dart, and fl_chart.
- Built a REST API backend with Node.js, Express, MongoDB, JWT authentication, and Docker containerization.
- Integrated OpenAI to provide empathetic chat support and crisis resource recommendations.
